

Raúl Sánchez

UI Developer - Web Designer

I am a passionate of front-end development, tinkering with HTML and CSS since my adolescence in a completely self-taught way. Focused in UI area. Creator of Flexus Framework CSS. Fall in love with flexbox and responsive design. In recent years specializing in the development of projects that require a high demand in design. I refuse to go to bed every night without having learned something new. Follower about new technologies available to implement them in every new project. Self-taught by vocation, curious craft.

ACADEMIC BACKGROUND

June 2009
July 2013

IT Engineer

Universidad Tecnologica de Coahuila.

Specialized: Multimedia Design.

PROYECTS

Nov 2015

Flexus. Framework Css.

I started a personal grid in november 2015 due I found several issues and deprecated things in frameworks like bootstrap, fundation and materialize. Nowadays It became in a whole framework css with the difference it's based on flexbox from scratch. I still work on it.

June 2015

Power Niño Dibujo

I developed an animation called "Power Niño dibujo". I designed the characters, voices, stages, animations, story and trailers. you can find it on youtube with the same name.
