# Raúl Sánchez

I am a CSS3 expert designer, creator of Flexus CSS Framework. Focused on making design files and converting them into an free error, pixel perfect, hand-coded, SEO optimized markup, In love with flexbox and responsive design. I like to venture into projects and companies where I feel I can add these innovations and maintain these high design standards.

I worked on branding campaigns, social media content. web designs and banners.

PROJECTS

Flexus CSS Framework.
2015-2017

I started a personal grid in november 2015 due I found several issues and deprecated things in frameworks like boostrap, funda-tion and materialize. Nowadays it became a whole css framework based on flexbox from scratch.
